

2018 Lawn Care Program

Your program will consist of 6 granular treatments along with liquid weed control as needed. Each application is season specific and scheduled approximately 6 weeks apart. The program also comes with complimentary service visits, per request, in between scheduled applications.

Round 1 – Crabgrass Control with Fertilizer - Dimension 0.15% + fertilizer. Provides 'pre-emergence' control of crabgrass and can also provide 'early post-emergence' control of crabgrass during early stages.

Round 2 – Turf Fertilizer - Nutrite 20-0-5 w/ 3% Fe. Slow release fertilizer that provides gradual and consistent nutrient release, including iron that provides deep green color without excessive top growth.

Round 3 – Grub Control with Fertilizer - 17-0-3 3% Fe with MALLETT – Lambda. Professional grade, slow release fertilizer that controls insects ABOVE and BELOW the ground.

Round 4 – Turf Fertilizer – Nutrite 20-0-5 w/ 3% Fe.

Round 5 – Turf Fertilizer with Lime trace minerals - 18-0-6 powered by AMP-XC. Premium fertilizer combined blended with protein hydrolysates and humic acids to increase plants ability to absorb macronutrients.

Round 6 – Turf Fertilizer - 21-0-21. Applied late in the season and designed to help lawns store more food for winter survival, also encourages rapid growth and rooting in the spring.

Spring Lime – Applied with first or second application to help maintain the pH level in your lawn. Helps balance the acidic New England lawns.

Great Care offers lawn care programs, tree and shrub programs, tick and mosquito applications, aerations, thatchings and seeding. We will also provide specialized treatments that may be specific to your lawn, including, but not limited to fungicides and insect controls
